

# One Call Does It All!

## **Onstream Media WebConference**

***A fast, easy, low cost way to experience meetings on the web.***

Incorporate Onstream Media WebConference into your business process to drive productivity within your organization. Users can share applications, presentations, documents—even their desktop, in real time within any web browser, making online meetings from any computer with a network connection a snap.

With real time interactive multimedia communications, you can enhance operational efficiency, increase sales force effectiveness, and improve customer and partner relationships.

Onstream Media WebConference allows you to do everything you can do in a face to face meeting, easily and cost effectively.

***• Deliver dynamic and interactive presentations to your vendors, partners, and customers. With a simple mouse click an Onstream Media WebConference is started—and it's just as easy to invite participants, demonstrate products and annotate documents.***

***• View, or edit documents in real time and conduct spontaneous Q&A sessions. Work on a budget, collaborate on a presentation or just communicate without the hassle or expense of traveling.***

### ***No additional hardware or software required***

The solution is a web-based, hosted service, with no up-front costs for new hardware or software. If you have a telephone and Internet connection, you can hold an Onstream Media WebConference

### ***Features:***

### ***Features:***

***Presentation Sharing:*** Allows a participant to share a presentation via a standard Web browser.

***Application Sharing:*** Enables conference host to demonstrate and share control of any software application with others in an interactive meeting. Effective for live demos and training.

***Desktop Sharing:*** Presenters can share anything on their PC system, including any application or file. Allows another participant (for example, a customer support person or sales engineer) to take temporary control of a user's desktop (with the user's approval) in order to provide live assistance or demonstrate an application on that particular system.

***Integrated Phone Bridge:*** No need to set up a separate conference call. A toll free number is available utilizing the same passcode and pin as your web conference. Operators can assist you in locating late participants.

***Annotation:*** Allows each participant to make comments and notes directly on a document or presentation during a conference session.

***Text Chat:*** Send chat messages to all participants.

***Record and Playback:*** Digitally record all interaction in a meeting for future playback.

***24x7 Live Technical Support:*** Live expert technical support is available when you need it (no charge).
